

## Give your ēno board a lift

Combine your ēno interactive whiteboard with a height-adjustable mount to accommodate the needs of both teacher and student. Now everyone can access the board by simply raising or lowering it to a comfortable level.

The Conen solution is a modular configuration for mounting on a wall or mobile stand. The cable-and-spring system allows for smooth operation and 20" of height-adjustability when moving the board. Universal projector booms fit virtually all popular short throw projectors.

## Features

- Smooth height adjustment makes it easy for one person to raise and lower the board—an ideal solution to accommodate everyone.
- Compatible with ēno interactive whiteboards and all popular short throw projectors
- Meets requirements of the Americans with Disabilities Act and Architectural Barriers Act Accessibilities Guidelines

The smooth, vertical movement of the adjustable mount makes access easy for everyone.
