

NOBI↑

For Education K thru 12 and
Anytime/Anywhere Computing

Education

NOBI is a mobile computing device designed specifically to meet the unique learning needs of elementary school students. Purpose built to enhance both teaching and learning, the NOBI engages children with "real PC" performance in a durable, capable and affordable solution for classrooms around the world and in your community. Consult with your educational customers and plan a pilot program (Rugged / Colorful / Kid Friendly / Windows OS / Software / Web Camera)

Available in
August - 08

Anywhere / Anytime

NOBI is the perfect anytime/anywhere complimentary computing companion. Whether visiting friends or on a weekend get-away, the NOBI's compact, rugged and low-cost design makes it the ideal piece of gear to stow along for the trip. Without the size, weight and expense of a full-sized notebook, you're able to access the internet and email, listen to your music - even store and view photos. (Rugged / Low Cost / Windows OS / USB / Wireless / Card Reader).
