

# Beacon

The patent pending Beacon™ combines the clarity and smooth sound coverage of a line array system with an enclosure that eliminates the need for a speaker stand. The enclosure includes three 8" woofers and an array of eight 4.5" mid-range speakers that deploys up to a height of 6'. The Beacon provides a 120 degree pattern for a distance of 500' which covers the area of a football field with just one system. Beacon is in a class by itself.
